

NEW MACHINE FROM SEPPI PROVES TO BE A STAR

The drive to do more with less and to do it better has never been as keen as it is today. For many years Seppi have made a large range of mulching heads for excavators and in more recent years they have diversified into stump grinders and stone crushers.

The New Seppi Star FC combines these machines into one very heavy duty head that is designed to be fitted to excavators from 15-35 tonnes and to take up to 300hp.

The Star FC is designed to grind stumps up to 40 cm, crush stones up to 15 cm, destroy roots to a depth of 30 cm, till the soil to a depth of 30 cm, to prepare for new planting, mulch unwanted vegetation up to 40 cm, and resurface stone tracks or roads.
